

Anywhere Directory Services

Adminpage for Anywhere phone book: <https://adsbeta.anywhere.vc>

Function:

External phone book for video endpoints. The endpoint connects to this service to receive a centrally managed phone book which is separated pr customer.

NB: Does not integrate with Cisco Jabber

Description of the service:

The phone book has self service where you can register a user account on

<https://adsbeta.anywhere.vc>.

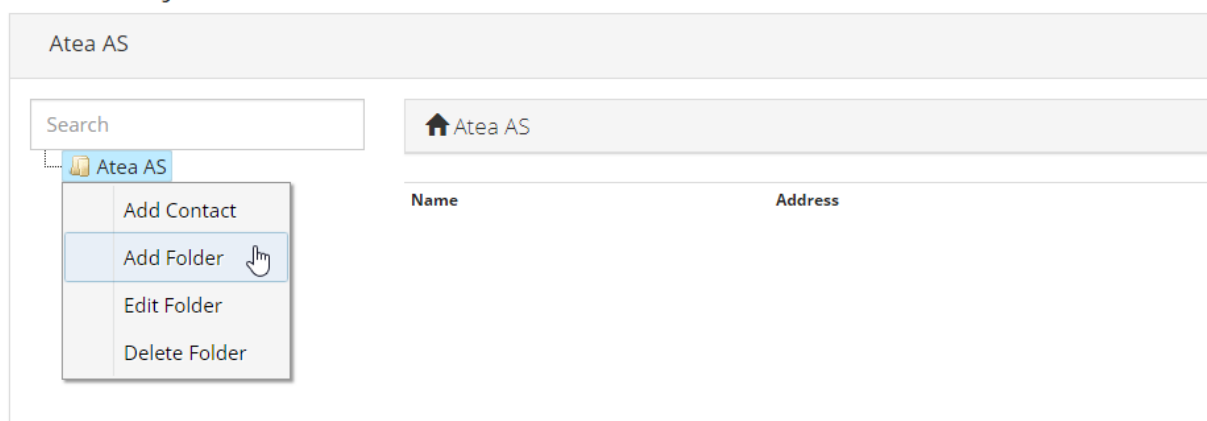

After user has registered and verified their email account then an administrator from Atea has to connect the newly created user to the correct customer from administratorlevel.

When this has been done then the user has full admin access for their own phone book where you can create contacts and a folder structure to organise them.

Create folder:

Right click on root folder and select «Add Folder»

Directory

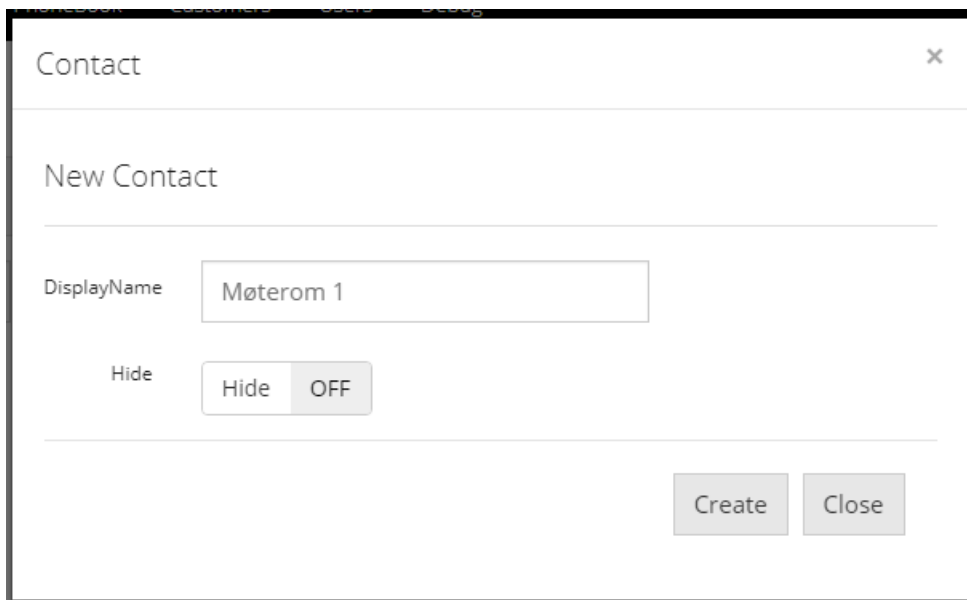

Anywhere Directory Services

Create contacts:

Right click on the folder you wish the contact to be created in and select «Add Contact».

DisplayName is the name of the contact as shown in the phone book.

If you set Hide to «ON» then that contact will not be displayed in the phone book.

Dialog box titled "Contact" with a close button (X). The main title is "New Contact".

Fields:

- DisplayName: Møterom 1
- Hide: OFF

Buttons: Create, Close

When the contact has been created you have to add an address.

Directory

Directory view showing the hierarchy:

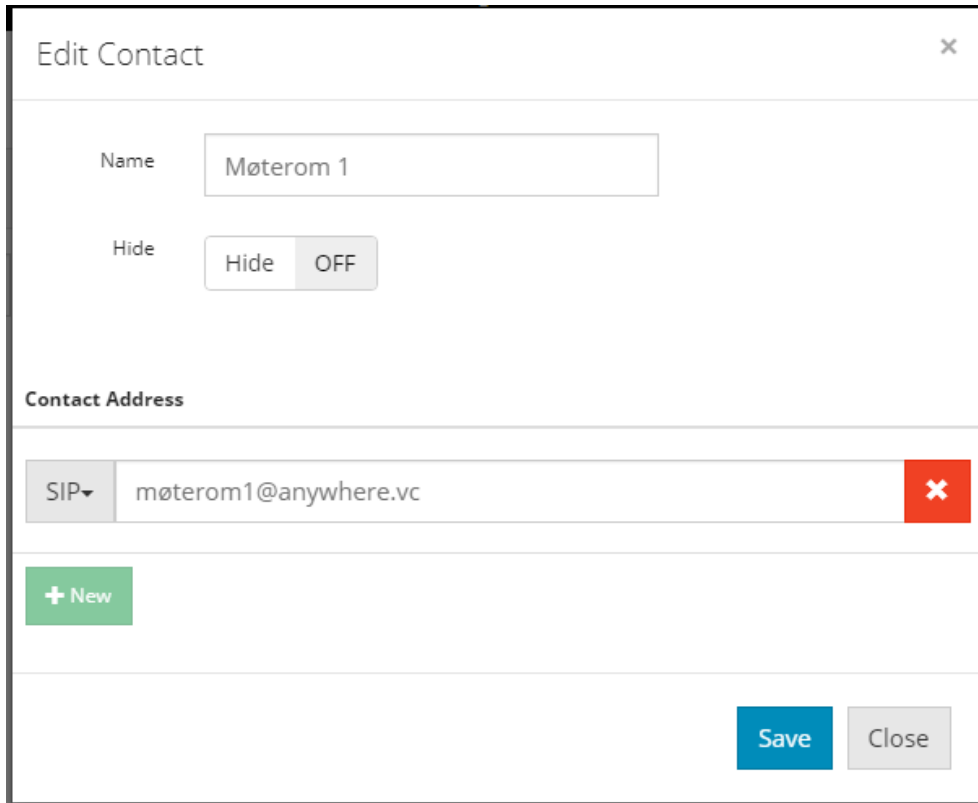

- Atea AS
 - Møterom
 - Virtuelle møterom

Table of contacts:

Name	Address
Møterom 1	

Anywhere Directory Services

Click on the icon as shown in the previous photo and then click on «New». Add the address that belongs to this contact and press Save.

The screenshot shows a web-based interface for editing a contact. The window title is "Edit Contact" with a close button (X) in the top right corner. The form contains the following elements:

- Name:** A text input field containing "Møterom 1".
- Hide:** A toggle switch labeled "Hide" with "OFF" selected.
- Contact Address:** A section header above a text input field containing "møterom1@anywhere.vc". To the left of the input is a dropdown menu labeled "SIP" with a downward arrow. To the right is a red square button with a white "X" for deletion.
- + New:** A green button with a white plus sign and the text "New" located below the address field.
- Save/Close:** Two buttons at the bottom right: a blue "Save" button and a grey "Close" button.

In this example a contact named Møterom 1 have now been created under the folder "Møterom". After the contact has been created you should be able to see it immediately on your video system.
